VAYER'S

CHERRY PECTORAL

For the Cure of

COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

And by the virtue upon the bank thereof shall grow all trees for meat, whose leaf shall not fade, neither shall the fruit thereof shall be for meat and the leaf thereof for medicine.

Ezekiel xlvii. 12.

The above text for the sick recorded long ago, and every year it grows more to the assurance that these words shall not fail.

Dr. Vayer declares and distinguishes the remedy above given, one by one, the diseases that it can safely and to the control of art. Of all the maladies we suffer from, none has caused more victims than chronic grave than Consumption of the Lungs. Such are strong evidence that this too may be cured by Cherry Pectoral.

Delay will not permit us to publish here any proportion of the cures it has effected, but the Agent below named will cheerfully give Circulars, wherein are full directions and truthful particulars of facts.

Sufferers, read and judge for yourselves!

FOR INFLUENZA & WHOOPING COUGH

Nashville, Tenn., June 26th, 1851.

Dr. I have repeatedly used your Cherry Pectoral for my self, wife and children, and have, in hesitation in saying it is a safe remedy. Four of my children were afflicted with Croup a few days, and from the use of the Pectoral has always set right at once.

I attest the truth of the above statement.

FOR A CONSUMPTIVE COUGH

Pittsburgh, Pa., Feb. 25, 1851.

Dr. Sir—For three years I have been afflicted with a cough so distressing that I frequently despaired of relief. In the fall of the last I was advised to set up all night and sleep with my head elevated, which was the only position in which I could breathe. I was induced to try your CHERRY PECTORAL, and from the first dose I took I found relief. I have since used many remedies without effect; but I can truly say that your CHERRY PECTORAL is the only medicine that has ever benefited me.

JAMES M. COLLINS.

From the President of Amherst College

Amherst, Mass., Feb. 12, 1852.

Dr. Sir—I have taken pleasure in recommending your Cherry Pectoral to the public, as a remedy for Coughs, Colds, Influenza, Whooping Cough, Croup, Bronchitis, and the early stages of Consumption. I have used it in my family for several years, and have found it the best remedy we have ever used for the relief of lung complaints.

WHIG NOMINATIONS.

FOR GOVERNOR,

William G. Crosby

OF BELFAST.

FOR CONGRESS

ISRAEL WASHBURN Jr.

Life in New York.

If we may judge from reports in the New York papers, there is but little security of life and property in New York city. An article in the Tribune of the 7th inst., represents the state of affairs there in this particular as deplorable. The demand for revolvers, bowie-knives, and other deadly weapons, it says, has been steadily and rapidly increasing for a few weeks past, until it has excited attention and remark from nearly all who observe the extensive business going on at shops where such things are sold. Since the close of the Mexican War there has been no such demand in the city. The cause is, that the insane, demoniac spirits of Rowdyism and Rum rule the city, and there is no security for life and property there except so far as one may be able to *defend himself.* Ruffians who acknowledge no master but brute force, have control in some parts of the town, and the officers of the law stand in fear and trembling before them.

This is a sad state of affairs, indeed, particularly as the elections are coming on, directly when these creatures, from the subserviency of office seekers, will be more in the ascendant than they are now.

Nothing but the "Maine Law" will cure this state of things in New York.

Selling Liquor Under Difficulties.

At the trial of Stephen M. Jeffery for being a common seller of intoxicating liquors, Marshall Farnham being called upon to give a description of the place where Jeffery sold, testified:

That in going to it he passed from Exchange St. into the store kept by Edward Tebbets, called the Alhambra; from the store up two flights of stairs, when he came to a double door, nailed thoroughly, through which was an augur hole. The door was barred when he reached it. He was detained there from three to five minutes. During this time he heard the sound as of a pitcher falling and breaking upon the floor, and liquor running from it. When admitted he saw the liquor upon the floor which smelt strongly of an alcoholic liquor. A bell was in the room to which were attached a wire leading to the store. When he left the store, the bell was rung and the alarm given to those above, and the door was closed.

Question—How did you know it was intoxicating liquor you saw upon the floor?

Answer—I knew it by the smell.

Opposing Counsel—Oh, he could smell liquor from one end of the city to the other.

Question—Who was in the room?

Answer—Stephen M. Jeffray and Bracket the blacksmith, and some others I did not know.

Question—What were they doing?

Answer—Laughing.

They thought they were safe stowed away with their pitcher of o'bejoyful in this garret, not dreaming what virtue there is in a Marshal's nose to smell them out. It is rather a "tight fit" for them, and one which we think will hardly "pay."

A Valuable Recipe. All the ladies who have plants, and all other persons who love to see their shrubs and plants thrive, will find in the June number of the Horticulturist, just come to hand, much valuable information. Among other good articles, is one entitled "*Liquid Fertilizer for Choice Plants,*" by a New York amateur, from which we obtain the following recipe:

"Dissolve sulphate of ammonia in water, at the rate of half an ounce to a gallon of water, and with it water the plant *every sixth time.*"

The writer says he mixes a barrel of it every Friday, and uses it on Saturday, upon plants that he particularly wishes to invigorate and stimulate. If it is used oftener than the writer directs, the effect will be to stimulate the plants too much. He has tried it on strawberries, early peas, fuchsias, dwarf pears and Dahlias, with remarkable success. Gardeners who wish to raise specimen plants for exhibition will find this mode of watering them *every sixth time* with the solution, to produce a perfection of growth not to be surpassed in any other way.

Brewer and the Railroad. The people of Brewer are not behind hand in any worthy enterprise. We know of no people who subscribe more liberally or do their part more readily, than our neighbors on the other side of the river, towards the furtherance of any project which is likely to be of advantage to the country. They have done well in the outset for the Bangor and Waterville Railroad, having subscribed the sum of $3000 unhesitatingly, and we doubt not they will render further aid if necessary.

Other towns in the neighborhood, we trust, will follow the example of Brewer, for they are all to derive benefit from the road.

Mr. Pierce and the Presidency.—The Democratic State Convention of New Hampshire, assembled at Concord in January last, nominated him to the Presidency, but he declined the nomination, in a letter which concluded thus:

"To these, my sincere and grateful acknowledgments, I desire to add, that the same motives which induced me several years ago to retire from public life and which since that time have controlled my judgment in this respect, now impel me to say, that the use of my name in any event, before the Democratic National Convention at Baltimore, to which you are a delegate, would be utterly repugnant to my taste and wishes."

Mr. Pierce, nevertheless, will accept the nomination.

A Fresh Labor Saver South.—The New Orleans Delta, closes an article on the extensive immigration of the Chinese to California, with the following significant remarks:

"We are perfectly satisfied that before long the attention of Louisiana planters will be directed to the consideration of new and improved plans of Management; and among them, and in the very first rank, we expect to find this one of Chinese labor, which, in almost every respect economy inclusive, is superior to that now given by the Africans. At all events we think an admixture of the two will be found worth a trial, as an experiment, involving no dangerous consequences."

Bangor Man in Boston.—Major Francis Brinley was elected Captain of the Ancient and Honorable Artillery Company, last Monday, and Frederick A. Allen was elected Lieutenant. There can be no question that they will add much to the military renown of the Bay State, though we are not aware that they ever exhibited any predilection for the sword while amongst us.

The coast survey observatory at Washington was, on Thursday, struck by lightning, by which the wires were destroyed. The transit instrument, the astronomical clock, and the building were uninjured.

On Friday last fifteen babies found themselves together in one car on the morning train for Albany, over the Western Railroad. A wag on board remarked, when half a dozen of them were crying, that it appeared like concerted movement.

Mt. Hope Cemetery Corporation. At the annual meeting of this Corporation, held on Tuesday afternoon, the following officers were elected:

Amos M. Roberts, President.
John Bright, Secretary.
A. W. Pike, Treasurer.
H. A. Head, J. ... Godfrey, Albert ... Executive Committee.

In the case of State v. Elijah S. Pease, for forgery, the Jury returned a verdict of guilty.

The Democratic Nominees.

We copy the following notice of Messrs. Pierce and King, from the Boston Traveller:

Mr. Pierce is the son of Benjamin Pierce, formerly Governor of New Hampshire. His father was in the battle of Bunker Hill, and served constantly in the army of the Revolution from that date till after the ratification of peace in 1783. He was born in Hillsboro', N. H., in 1804, and is therefore about 48 years old. He was graduated at Bowdoin College in 1824; was admitted to the bar in 1827; was elected a Representative to the Legislature of New Hampshire in 1829, and the three following years; was Speaker of the House of Representatives of that State in 1831 and 1832; was elected Representative to Congress in 1833; and was in 1835 elected to the U. S. Senate for six years, but resigned his seat two or three years before the expiration of his term. A vacancy occurring in the U. S. Senate afterwards, he was appointed thereto by Gov. Steele, but declined.—In 1846 or 1847, President Polk tendered Mr. Pierce the office of Attorney General of the U. States, and consequently a seat in the Cabinet. This honor he likewise declined.

In February 1847, ... Mr. Pierce received, most unexpectedly, notice of his appointment as Colonel of the 9th infantry, which he accepted without hesitation; and in the March following was promoted to the rank of Brigadier General. He reached Vera Cruz on the last of June in that year 1847, and commanded the detachment of 2500 men, who was the last to march from Vera Cruz and join Gen. Scott's command at Puebla, before the final advance upon the city of Mexico. He bore a part in all the battles of the valley, except the assault upon Chepultepec, where he was confined to his bed by sickness. He is a man of acknowledged ability, and by the suavity of his manners seems to have gained a large circle of warm personal friends.

CONGRESS.

Washington, June 7.

Senate. Numerous petitions in favor of the passage of the Homestead bill were presented.

Mr Weller presented proposals for carrying the mail from San Francisco to Panama semi-monthly, with the resolutions adopted by the California Legislature in its favor.

On motion of Mr. Borland, the bill authorizing the presentation of erroneous locations of military land warrants, was amended and ordered to be engrossed.

Mr. Davis of Mass., presented upwards of twenty memorials of steam engineers residing on the Northern lakes, and the rivers, bays and gulfs of the Atlantic coasts, praying the enactment of some laws, correcting as far as practicable, the evils that now exist in the conduct of steam vessels, and to provide for the better security of the lives of passengers on board of vessels propelled in whole or in part by steam.

Mr. Hamlin, from the Committee on Commerce, to which were referred memorials praying the abolition of the tax of 20 cents a month on seamen's wages for hospital fees, made an adverse report. On motion of Mr. Hamlin, it was resolved that the Committee on Commerce be directed to inquire into the expediency of so altering the law as to authorize the Secretary of the Treasury to issue registers to vessels built in foreign countries, when the same have been wrecked in the United States, and when the amount of repairs shall be three fourths of the value of said vessel when so repaired.

The Senate passed several bills, and afterwards went into executive session and adjourned.

House. The House resumed the consideration of the bill granting lands to States for the benefit of indigent insane.

Mr Stanley demanded the yeas and nays on the pending motion to refer to Committee of the Whole. The motion did not prevail—yeas 56, nays 115.

The House then took up the resolution of Mr Harris of Tenn., proposing an adjournment of Congress on the 2d of August.

Mr Richardson said he was desirous of adjourning at the earliest practicable day and moved an amendment, making the adjournment for the 16th of August. This was agreed to, ... the resolution was amended accordingly.

Mr Cobb of Ala., made an ineffectual motion that the House hereafter meet at 11 o'clock.

Mr Jones of N Y, asked leave to present the resolutions recently passed at a meeting in Syracuse, requesting him to urge upon Congress the passage of a law granting to Thos F Meagher the right of citizenship without the formality of observing the laws relating to naturalization. Objection being made, he moved to suspend the rules.

Mr Stevens of Ga., said that Congress had no such power, therefore it was of no use to suspend the rules for what cannot be granted.

A voice—How will Meagher vote for President?

The House refused to suspend the rules, and then proceeded to the consideration of territorial business. Several bills relating to them were then passed, including one to run the boundary between Texas and the United States territories, another for the construction of a military post road in Oregon, and a third authorizing the Legislatures of the several territories, with the exception of Utah, to control the appropriations made by Congress for the support of government of the said territories. The House then adjourned.

Correspondence.

The Rapids—Scenery on the St. Lawrence—Railroads—Steamboats, &c.

To the Editor of the Whig and Courier

Montreal, (Canada,) June 6, 1852.

Did you ever descend the mighty rapids of the glorious St. Lawrence? Oh heavens! what a grand spectacle! There's nothing like it on this habitable globe! I took the steamboat British Empire, under the command of Mr. Allen, at Ogdensburgh, at 8 o'clock, A. M., and arrived here about 8 P. M., having been steaming over the rushing waters of this mighty river about 140 miles during the day. And such a ride cannot be had in another quarter of this planet. But let me be a little more particular for the benefit of your readers. The river at Ogdensburgh is between 2 and 3 miles wide, and the water is clear as crystal. The steamer swings off from the dock, and away she goes over the swelling bosom of this independent river. I call it *independent* because it seems not to be disturbed by outward forces, but rushes along towards the Atlantic in the majesty of its own strength. You know there is often such an occurrence on your beautiful Penobscot as a freshet, but who ever heard of a freshet on the St. Lawrence? One might as well expect a freshet on the Atlantic Ocean. No, there never was but one freshet here, and that happened when the windows of heaven were opened in the manner we read of in the Scriptures of Truth.

On the boat passes, and soon you come to what are called the *Gallops.* These are about two miles long, and in that distance the fall is only ... feet, but the sight is grand and exciting even here. These rapids the Steamboats can stem, and are not obliged to take the canal in returning. At some points, however, the struggle in the Gallops between the power of steam, and the current of the river is very severe, and apparently doubtful to the passengers who has never before come up over them. Now you sail along in gentle water, among green isles, and amidst magnificent scenery. Now what is called the *Rapide du Platte,* a French term for flat water. These rapids are ten miles long, and the descent in that distance is forty ..., but it must be remembered that the descent is by no means gradual, for in some places, the water runs quite swift. The scenery here begins to grow more exciting. Now you come to the *Long Sault,* which is nine miles in extent. Some portions of these rapids make the boat dance, and feel as light as an egg-shell on the bubbling and boiling waters. The grandeur increases, and the passenger's hair begins to stand on end. The fall over these rapids is eighty seven feet.

Now you get into smooth water and run over the Lake St. Francis, which is thirty or forty miles long, and some places eight or ten miles wide. It is called a lake, but it is only the widening of the river, and yet it makes a pretty respectable lake, I can assure the readers of your journal. Keep steady and your eyes down stream, for you are approaching the Cedar rapids which are ... miles long, and the fall is ninety-seven feet. Now you get upon the raging waters, and away the boat goes like a thing of life! Sublime, and more sublime the scene grows every minute. Your nerves are much excited, and in a short time you have passed the Cedar Rapids, feeling that ... you are safe over, and yet wishing to go down the ... rapids which are ... miles long ... forty ... feet. These rapids in one place are more ... [illegible] ...ly over, but she plunges over, trembles and pants again into smooth water, and once more you breathe easy.

Now the Montreal mountains, the towers of the mighty Cathedral, the tin-covered spires of churches and glittering roofs greet your eyes, and you feel as if you have performed a great feat. The scenery all the way on this river is magnificent and challenges our admiration. At Indian village Coughnawauga, we took on board an Indian Pilot, who directed our course over the Lachine Rapids. He is a noble fellow, and his good face and keen eyes, inspire the passenger with confidence. After passing over the last rapids the Captain asked me if I was satisfied. I told him if I was not, I would go and plunge into the raging waters of Niagara Falls, and that would probably end one's curiosity.

The docks along the banks of the river in front of the city present some fine specimens of masonry. The British do up their work, apparently, more for eternity than for time, while the Yankees are in a great hurry to get things in running order, and have them coining the almighty dollar. The Hotels of Montreal are on a large scale, and their appointments are really splendid. "The Donegana Hotel," in Notre Dame Street, under the administration of Mr. Daley, is a magnificent establishment. I have seen nothing in the States to compare with it. The rooms are very spacious and filled with rich massive furniture. The dining hall is sublime, and the way the long tables are loaded is a great attraction to the epicure, and makes one love to linger around them. The facilities for traveling are now such that the people of Bangor and vicinity, can come here very rapidly. They can start from Portland, take the White Mountains on their way, get on board the cars in the valley of the Passumpsic river, then on the Vermont Central Railroad, cross Lake Champlain at Rouse Point on a bridge and long boat that bear the engine and cars over, then on the Ogdensburgh route, take a boat down the river, and here you are, full of the excitement and pleasure the excursion has produced.

I would write more, but my sheet is full. It is a glorious trip, and Bangorians may enjoy it to their full.

Clapboard Planing!

A Challenge!

THE subscribers are running one of Woodbery's Stationary-Knife machines for planing Clapboards, and claim to be able to plane all kinds and qualities better than can be done by any other method now known. And as in a recent estimate for a contract to build the new High School House, in this city, a stipulation was inserted that *the Clapboards should be planed by hand,* thereby intimating that HAND-PLANING is superior to MACHINE—now be it known that we challenge any person to plane any quantity of Clapboards from 100 upward, by hand, (a fair day's work being done,) against the like quantity planed by us with our machine.

A committee of three practical workmen, mutually chosen, to decide the merits of the work, under whose decision the losing party shall forfeit to the other

We wish to have all kinds and qualities of Clapboards, WET and dry, submitted to this test. We will show our great superiority on the *poorest* as well as the best quality.

Moore's Essence of Life.

THE Great Remedy for Coughs—Colds—Whooping Cough, and Bowel Complaints—The Whooping Cough can be cured in a week if taken at the commencement of the disease. Thousands die annually who might be saved if they checked their Colds at the beginning. This can be done by the use of MOORE'S ESSENCE OF LIFE—this is no humbug—witness the good that it has accomplished the past few years in your own vicinity, to those afflicted with the Whooping Cough and Bowel Complaints. It is sure to cure if taken in season. If the reader has a child afflicted with the Whooping Cough let him obtain one bottle and try it, and if that proves satisfactory obtain another, persevering in its use until a cure is effected—you cannot help being satisfied. For common Colds and Coughs it is as sure to the cure. Now why will you suffer when a cure can be easily effected—why will you let your children die when a remedy can be obtained so easily. Look out and get the genuine—prepared by E. E. HAYWARD, Hadley, Mass.—and sold by H. B. Hall, F. Brown, Wm. Mann, A. P. Guild, Bangor. Mc. L. PATENTS.

American and Foreign Office,

AGENCY FOR BUSINESS WITH U. S. PATENT OFFICE, WASHINGTON.

No. 22 State Street, Boston.

IN 1840, the subscriber was appointed by the Commissioner of Patents, Agent of the U. S. Patent Office, in accordance with the 10th Sec. of Act of 1837.

Having relinquished the Agency for the transmission of Models, and adopted a more expeditious mode of sending them to the Patent Office, where by a Patent may be procured about six weeks earlier, he continues to forward them free of expense—to prepare Caveats, Specifications, Assignments, and all the necessary Papers and Drawings for Patents, and to render advice on legal and scientific matters respecting the same. Patents secured in Europe and other countries.

By application at this office, inventors preserved the time and expense of a journey to Washington and delay there, as well as all personal trouble in obtaining their patents. They also have the advantage of verbally explaining their inventions and of consulting in respect to them; matters in general of paramount importance in order to obtain correct specifications and claims. The experience of sixteen years practice, an extensive collection of rare works, decisions, &c. on mechanical subjects, the Patent Laws, and patents of different countries, collected at much expense during the long time this office has been established, together with accounts there kept of inventions patented at Washington, enable the subscriber to afford inventors desirous of procuring Patents, assistance and information which in other respects might be difficult of attainment.

R. H. EDDY, Solicitor of Patents.

WASHINGTON, JULY 21, 1849.—During the time I occupied the Office of Commissioner of Patents, R. H. EDDY, Esq. of Boston, did business at the Patent Office as Solicitor for procuring Patents. There were few, if any, persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity and success. I regard Mr Eddy as one of the best informed and most skillful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents.

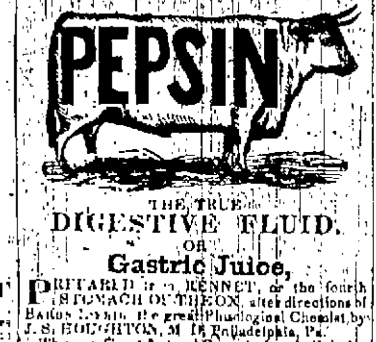
Another Scientific Wonder!

DR. J. S. HOUGHTON'S Great Dyspepsia Curer!



THE TRUE

DIGESTIVE FLUID,

OR

Gastric Juice,

PREPARED from RENNET, or the fourth STOMACH OF THE OX, after directions of Baron Liebig, the great Physiological Chemist, by J. S. HOUGHTON, M. D., Philadelphia, Pa.

This is a Great Natural Remedy for Indigestion and Dyspepsia, curing after Nature's own Method, by Nature's own Agent, the Gastric Juice. PEPSIN is the chief element, or Great Digesting Principle of the Gastric Juice—the Solvent of the Food, the Purifying, Preserving, and Stimulating Agent of the Stomach and Intestines. It is extracted from the Digestive Stomach of the Ox, thus forming an ARTIFICIAL DIGESTIVE FLUID, precisely like the natural Gastric Juice in its Chemical powers, and furnishing a complete and perfect substitute for it.—By the aid of this preparation, the pains and evils of Indigestion and Dyspepsia are removed just as they would be by a healthy Stomach. It is doing wonders for Dyspeptics, curing cases of Debility, Emaciation, Nervous Decline, and Dyspeptic Consumption, supposed to be on the verge of the grave. The Scientific Evidence upon which it is based, is in the highest degree curious and remarkable.

BARON LIEBIG, in his celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid, analagous to the Gastric Juice may be prepared from the mucous membrane of the stomach of the Ox, in which various articles of food, as meat and eggs will be softened, changed and digested, just in the manner as they would be in the human stomach."

Half a teaspoonful of pure Pepsin, infused in water, will digest or dissolve Five Pounds of Beef in about two hours out of the stomach.

Dr. HOUGHTON'S PEPSIN is sold by nearly all the dealers in fine drugs and Popular Medicines throughout the United States. It is prepared in Powder and in Fluid form—and in Prescription vials for the use of Physicians.

PRIVATE CIRCULARS, for the use of Physicians may be obtained of Dr. Houghton or his Agents, describing the whole process of preparation, and giving the authorities upon which the claims of this new remedy are based. As it is not a secret remedy, no objection can be raised against its use by Physicians in respectable standing and regular practice.

Price, in Fluid form ONE DOLLAR per bottle.

PEPSIN IN POWDER.

Sent by Mail, free of postage.

For convenience of sending to all parts of the country, the DIGESTIVE MATTER OF THE PEPSIN is put up in the form of Powder, with directions to be dissolved in water by the patient. These Powders contain just the same matter as the bottles, and will be sent by mail, free of postage, for ONE DOLLAR, sent (post paid) to Dr. J. S. HOUGHTON, Philadelphia, Pa.

OBSERVE THIS!—Every bottle of the genuine PEPSIN bears the written signature of J. S. HOUGHTON, M. D., sole proprietor, Philadelphia, Pa.

Price $1 per Bottle, or Six Bottles for $5.

It is now put up in QUART BOTTLES, of the same power and medical efficacy as when in bottles. The great Superiority of this Blood [illegible] all other medicines, consists in its great [illegible] containing as a part of its compound the [illegible] Virtues of some Scarce and Rare

which no other medicine possesses. These are the most certain Purifiers of the Blood that were ever known to either Indian or white man, and these being compounded with the strongly concentrated Extracts of
